This monograph consists of two parts. Part I investigates the Cohen-Macaulay and Gorenstein properties of symbolic Rees algebras for one-dimensional prime ideals in Cohen-Macaulay local rings. Practical criteria for these algebras to be Cohen-Macaulay and Gorenstein rings are described in terms of certain elements in the prime ideals. This framework is generalized in Part II to Rees algebras $\mathcal{R}(F)$ and graded rings $\mathcal{G}(F)$ associated to general filtrations of ideals in arbitrary Noetherian local rings. Goto and Nishida give certain cohomological characterizations for algebras $\mathcal{R}(F)$ to be Cohen-Macaulay or Gorenstein rings in connection with the corresponding ring-theoretic properties of $\mathcal{G}(F)$. In this way, readers follow a history of the development of the ring theory of Rees algebras. The book raises many important open questions.

Master two essential subjects in engineering mechanics--statics and mechanics of materials--with the rigorous, complete, and integrated treatment found in STATICS AND MECHANICS OF MATERIALS. This book helps readers establish a strong foundation for further study in mechanics that is essential for mechanical, structural, civil, biomedical, petroleum, nuclear, aeronautical, and aerospace engineers. The authors present numerous practical problems based on real structures, using state-of-the-art graphics, photographs, and detailed drawings of free-body diagrams. All example problems and end-of-chapter problem follow a comprehensive, organized, and systematic Four-Step Problem-Solving Approach to help readers strengthen important problem-solving skills and gain new insight into methods for dissecting and solving problems. The free website also contains nearly 200 FE-type review problems to help prepare for success on the FE Exams. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

• Chapter wise and Topic wise introduction to enable quick revision. • Coverage of latest typologies of questions as per the Board latest Specimen papers • Mind Maps to unlock the imagination and come up with new ideas. • Concept videos to make learning simple. • Latest Solved Paper with Topper ' s Answers • Previous Years ' Board Examination Questions and Marking scheme Answers with detailed explanation to facilitate exam-oriented preparation. • Examiners comments & Answering Tips to aid in exam preparation. • Includes Topics found Difficult & Suggestions for students. • Dynamic QR code to keep the students updated for 2021 Exam paper or any further CISCE notifications/circulars

Fully revised for the new edition, this handbook covers all significant aspects of acute and chronic paediatrics. Areas such as neonatology, surgery, genetics and congenital malformations, and child protection are covered in a user-friendly and succinct style.
