3: Information and Communication The AIS should produce high quality information which: identifies and records all valid transactions provides timely information in appropriate detail to permit proper classification and financial reporting accurately measures the financial value of transactions accurately records transactions in the time period in which they occurred

Accounting Information Systems: Basic Concepts and Current Issues, Fourth Edition, by Robert Hurt provides a highly approachable, interdisciplinary presentation of the fundamental accounting topics and information technology of AIS. It is written in a manner intended to develop professional judgment and critical thinking skills so students are prepared to be successful and effectively communicate with accountants and general managers whether their careers take them into public accounting, the corporate world, governmental and not-for-profit accounting, or another practice.

Accounting Information Systems provides a comprehensive knowledgebase of the systems that generate, evaluate, summarize, and report accounting information. Balancing technical concepts and student comprehension, this textbook introduces only the most-necessary technology in a clear and accessible style. The text focuses on business processes and accounting and IT controls, and includes discussion of relevant aspects of ethics and corporate governance. Relatable real-world examples and abundant end-of-chapter resources reinforce Accounting Information Systems (AIS) concepts and their use in day-to-day operation. Now in its fourth edition, this popular textbook explains IT controls using the AICPA Trust Services Principles framework—a comprehensive yet easy-to-understand framework of IT controls—and allows for incorporating hands-on learning to complement theoretical concepts. A full set of pedagogical features enables students to easily comprehend the material, understand data flow diagrams and document flowcharts, discuss case studies and examples, and successfully answer end-of-chapter questions. The book's focus on ease of use, and its straightforward presentation of business processes and related controls, make it an ideal primary text for business or accounting students in AIS courses.

This book is entirely up to date to reflect recent changes in technology and AIS practice. Covers such subjects as EDI, reengineering, neural networks, client/server, computer security, and events accounting.

Gain a strong understanding of the accounting information systems and related technologies you'll use in your business career with Hall's leading ACCOUNTING INFORMATION SYSTEMS, 9E. You'll find a unique emphasis on ethics, fraud, and the modern manufacturing environment. The book focuses on the needs and responsibilities of accountants as end users of systems, systems designers, and auditors. This text completely integrates Sarbanes-Oxley as it affects internal controls and other relevant topics. In this new edition, with thorough updates of the transaction cycle and business processes coverage, you examine the risks and advantages of cloud computing and gain a better understanding of the differences in the manual and automated accounting system needs of small and large companies. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Provide today's learners with a solid understanding of how to audit accounting information systems with the innovative INFORMATION TECHNOLOGY AUDITING, 4E. New and expanded coverage of enterprise systems and fraud and fraud detection topics, such as continuous online auditing, help learners focus on the key topics they need for future success. Readers gain a strong background in traditional auditing, as well as a complete understanding of auditing today's accounting information systems in the contemporary business world. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Intended for a one-semester course in Accounting Information Systems taught at the sophomore, junior, or senior level at most two- and four-year schools. This revision is completely streamlined, includes new pedagogy, and is accompanied by a CD-ROM containing added coverage, making it flexible enough to suit a variety of different approaches to the course.

At last - the Australasian edition of Romney and Steinbart's respected AIS text! Accounting Information Systems first Australasian edition offers the most up-to-date, comprehensive and student-friendly coverage of Accounting Information Systems in Australia, New Zealand and Asia. Accounting Information Systems has been extensively revised and updated to incorporate local laws, standards and business practices. The text has a new and flexible structure developed especially for Australasian AIS courses, while also retaining the features that make the US edition easy to use. nt

concepts such as systems cycles, controls, auditing, fraud and cybercrime, ethics and the REA data model are brought to life by a wide variety of Australasian case studies and examples. With a learning and teaching resource package second to none, this is the perfect resource for one-semester undergraduate and graduate courses in Accounting Information Systems.

This book examines the relationship between digital innovations on the one hand, and accounting and management information systems on the other. In particular it addresses topics including cloud computing, data mining, XBRL, and digital platforms. It presents an analysis of how new technologies can reshape accounting and management information systems, enhancing their information potentialities and their ability to support decision-making processes, as well as several studies that reveal how managerial information needs can affect and reshape the adoption of digital technologies. Focusing on the four major aspects data management, information system architecture, external and internal reporting, the book offers a valuable resource for CIOs, CFOs and more generally for business managers, as well as for researchers and scholars. It is mainly based on a selection of the best papers - original double blind reviewed contributions - presented at the 2015 Annual Conference of the Italian Chapter of the Association for Information Systems (AIS).
