Modern Auditing and Assurance Services 5th edition has been thoroughly updated in accordance with the Clarity Auditing Standards and presents a current and thorough coverage of audit and assurance services. The increased focus on contemporary audit practice - including professional ethics and ethical competence, governance and professional independence, and changes in legal liability for the audit profession - will equip students with the necessary knowledge and skills required by the profession.

Messier employs the audit approach currently being used by auditing professionals. This approach is a direct result of the demands of Sarbanes-Oxley, which has changed the way auditors do their jobs. The approach emphasizes understanding the entity (i.e., the organization or business being audited) and its environment (i.e. industry), and then assessing the business risks faced by the entity and how management controls those risks. This audit process focuses on business processes instead of accounting cycles. This unique and innovative approach has been developed in response to changing market dynamics. The systematic approach, referred to in the subtitle of the text, reflects the early introduction of three basic concepts that underlie the audit process: materiality, audit risk, and evidence; this allows Messier to build upon this model in subsequent chapters. These are central to everything an auditor does and a unique feature of Messier. As such, this approach helps students develop auditor judgment, a vital skill in today's auditing environment.

Focusing on auditing as a judgment process, this unique textbook helps readers strike the balance between understanding auditing theory and how an audit plays out in reality. The only textbook to provide complete coverage of both the International Auditing and Assurance Standards Board and the Public Company Accounting Oversight Board, Auditing reflects the contemporary evolution of the audit process. New additions to the book include expert updates on key topics, such as the audit of accounting estimates, group audit, and the Integrated Audit. Supplemented by extra on-line resources, students using this established text will be well-equipped to be effective auditors and to understand the role of auditing in the business world.

Developed by Helen Roybark of Radford University. New to the 4th edition, this companion resource offers students the opportunity to practice chapter material, reinforce key terms, and complete activities relating to the case study, "Townsend Office Supplies and Equipment."
