A haunted man. A desperate woman. A chilling secret that won't stay buried. Wise-cracking, street-smart private-eye Evan Buckley's wife went to work one day and didn't come home. He's never stopped looking for her. Tormented by demons, consumed by his unrelenting quest for the truth, he loses himself in other people's problems. When Linda Clayton's son Daniel disappeared ten years ago, she didn't think her life could get any worse-until her husband ran away. Makes you thankful you're not Linda Clayton. After Evan's latest case ends in disaster, he's at the end of his tether-until fate throws him headlong into Linda Clayton's desperate world and a long-dead investigation that everybody wants to stay that way. But Evan never does what everybody wants, and he vows to find answers for her that he can't find for himself. As the suspense ratchets up, he's caught in a desperate fight for his life with a stone-cold killer who will stop at nothing to protect his secrets ... With action-packed twists and turns and a pace that doesn't let up until the chilling conclusion, Bad to The Bones is a brilliant debut to a gripping new crime series from James Harper.

One buried crime. Many hidden secrets. A cold case investigation that

will have you gripped from the explosive start to the heart-pounding conclusion. A skeletal body is unearthed in a wooded area of Peterborough, Cambridgeshire. DI James Bliss, together with DC Penny Chandler, investigate the case and discover that the young, female victim had been relocated from its original burial site. A witness is convinced that a young woman was struck by a vehicle back in the summer of 1990, and that police attended the scene. However, no record exists of either the accident or the reported victim. As the case develops, two retired police officers are murdered. The two are linked with others who were on duty at the time a road accident was reported. As Bliss and Chandler delve deeper into the investigation, they start to question whether senior officers may have been involved in the murder of the young woman who was buried in the woods. As each link in the chain is put under duress, so is Bliss who clashes with superiors and the media. When his team receives targeted warnings, Bliss will need to decide whether to drop the case or to pursue those responsible, because the killer is much closer than they imagine . . . “Breathe[s] new life into a sometimes stale genre . . . full of dark humor, well drawn characters and plenty of surprises to knock me off balance.” –Novel Gossip Don’t miss *The Scent of Guilt*, the second thriller in the DI Bliss series!

BeagleBone Black is a low-cost, open hardware computer uniquely suited to interact with sensors and actuators directly and over the Web. Introduced in April 2013 by BeagleBoard.org, a community of developers first established in early 2008, BeagleBone Black is used frequently to build vision-enabled robots, home automation systems, artistic lighting systems, and countless other do-it-yourself and professional projects. BeagleBone variants include the original BeagleBone and the newer BeagleBone Black, both hosting a powerful 32-bit, super-scalar ARM Cortex A8 processor capable of running numerous mobile and desktop-capable operating systems, typically variants of Linux including Debian, Android, and Ubuntu. Yet, BeagleBone is small enough to fit in a small mint tin box. The "Bone" may be used in a wide variety of projects from middle school science fair projects to senior design projects to first prototypes of very complex systems. Novice users may access the power of the Bone through the user-friendly BoneScript software, experienced through a Web browser in most major operating systems, including Microsoft Windows, Apple Mac OS X, or the Linux operating systems. Seasoned users may take full advantage of the Bone's power using the underlying Linux-based operating system, a host of feature extension boards (Capes) and a wide variety of Linux community open source libraries. This book provides an introduction to this powerful computer and has been designed for a wide variety of

users including the first time novice through the seasoned embedded system design professional. The book contains background theory on system operation coupled with many well-documented, illustrative examples. Examples for novice users are centered on motivational, fun robot projects while advanced projects follow the theme of assistive technology and image-processing applications.

Col. Billy (Bill) Bearden is retired from the United States Air Force after thirty-six combined years of military and commercial flying. His travels have covered some 70 different countries. He is a graduate of Auburn University, 1964 with a Masters from Embry Riddle Aeronautical University (1976), Daytona Beach, Fl. with post Masters work accomplished at Troy University. Bill and wife Esther Lee enjoy a common interest in biblical history and archeology, experiencing different cultures, and each other. Their diverse professional and cultural backgrounds have enhanced their personal lives in many ways. Bill was raised in the deeply conservative Southern US (Alabama) while Esther was born in China. She was raised in Taiwan after the Communist took over China in 1949. She came to the US in 1967 to complete her education here in America. They both assemble with the Church of Christ in Ohatchee, AL and travel always with an evangelical spirit. This work is dedicated to Esther's loving support, my children, Casey

Witty commentary and hilarious observations.--Dog Living Let's get this clear right away: I'm a dog. I'm 1'10" and weigh 63 lbs, and although I'm a mutt on the outside, I'm a purebred on the inside. My good nature comes from the Golden Retriever side of the family, while my stubbornness is clearly from my Chowchow bloodlines. I've got Rastafarian ears, a black tongue for licking, and paws that should be on a dog twice my size. I type 60 words a minute. My name is Bo, and this is my story. From shelter dog reject to beloved pet and popular doggie blogger, Bo Hoefinger's life has been anything but ordinary. Join this incorrigible canine as he welcomes us into his life, complete with his wacky "parents," a constipated feline housemate, and chipmunk warfare. Bad to the Bone is an unforgettable, laugh-out-loud tale of love and loyalty that reveals the true heart of a modern American family.

Beverly Hills mansion to herself. It's a dream come true, only with no money and no one to cuddle. She's beyond bored. Until she meets a young R&B star and becomes part of her entourage. . . . It's round-the-clock craziness as Kiley's boss prepares to rock out at the VMAs. In between running ridiculous errands and getting ready to start her senior year at Bel Air High, Kiley meets a super cute guy. A guy who tells her some really bad things about her boyfriend, Tom.

"Could this have actually happened? That's the question you will be left to ponder as you read *Bad to the Bone*, a science fiction novel with historical references about the unexpected arrival of a new species of shark that developed due to human medical waste seeping down through the Florida aquifer and coming out in offshore submarine springs. As such, this new breed of shark uniquely craves human blood and bone marrow due to DNA changes from ingesting medical byproducts over decades. When full-grown a member of this new species is the largest individual predator on earth. The story centers around the Kings Bay Nuclear Submarine Base in St. Marys, Georgia. Under the backdrop of the construction of the base that took place in the late 1970s, sudden brutal shark attacks began occurring. The attacks were so brutal, that the victim's bodies, if located, were stripped of all flesh and blood products down to the pulverizing of the victim's bones

to get to the marrow. Meanwhile, many black, tannin-stained teeth are found washing up on nearby beaches. The Navy decides to remove a limestone mound found during a dredging operation and inadvertently releases a school of young predators into Kings Bay from their birthplace where they escape into the coastal waters and start to raise havoc with local fishermen and beachgoers. Later the Navy uses one of the most famous spy ships in the world, the Glomar Explorer, to lift the 100-ton mound and the mystery underneath. Everything is labeled secret by the Navy, so news of the new species is hushed as the Navy tries to avoid a public relations nightmare. Who knows? Maybe they did cover it all up.."--

Y, Suzi Wong and Cleo 'Patra' were destined to be friends. Natural warriors in every sense of the word, they also shared the dream of freedom from the clutches of work. Bad II the Bone was to be that freedom - a style emporium on three levels, providing everything that the 21st century woman desires. But their hard-earned investment money disappeared with Y's boyfriend - until a bizarre turn of events sees Bad II the Bone in their true element, protecting Spokes, a rich club promoter, from envious competitors. Or so they think.

romance between an agent with a dark past and a tough Texas cop gets too close for comfort. Jessica Daniels doesn't do specialty work—any more. Until a frantic call from her former handler's young daughter puts her back in the game. The man who ran Jessica's covert missions is missing, along with his black book. But dealing with the crisis her own way proves impossible when detective Sullivan Kincaid makes it clear that she's got a partner—and that he doesn't trust her. But Sullivan wants her . . . badly. Jessica is a woman hiding secrets and a past as brutal and dirty as his. Now she's made his job and his life way too complicated. But as they take on a powerful man's list of enemies, it's impossible to separate danger from desire. Sullivan knows the bad guys are playing for keeps. But so is he. And he'll take any risk to keep the woman he loves alive. Includes a special message from the editor, as well as excerpts from these Loveswept titles: *The Redhead and the Preacher*, *Raven and the Cowboy*, and *Ride with Me*.

Tells the stories of young biblical heroes who were not afraid to reject evil and to turn their lives over to God and suggests ways to respond to these accounts.
