Chapter 14 The

14. Human Genome

The human genome includes tens of thousands of genes.

In 2003, the DNA sequence of the human genome was published. In a few cases, biologists were able to identify genes that directly control a single human trait such as blood type.

Chapter 14 The

Human Genome

We do not have an
idea as to how

many human cells
there are. Scientists
estimate it to be
anywhere from
three billion to ten
billion. Although
this is all

guesswork, it ' s
very possible that
there are billions of
cells in your body.
