Biodiversity
should be looked
at and evaluated
not only in
terms of numbers
of species, but

also in terms of the diversity of interactions among distinct organisms that it maintains. In this sense, the complexity of web structure in tropical systems is a promise of future to nature preservation on Earth. In the

and who knows
what more.

Despite these
facts tropical
areas have been
exploited in an

irresponsible way for more than 500 years due the lack of an ecological conscience of men. Exactly in the same way we did with temperate areas and also tropical areas in the north of Equator line.

Access Free Crane Technical

Nowadays, is estimated that due human exploitation, nation conflicts and social problems, less than 8% of tropical nature inside continental areas is still now untouchable. The extension of
