Abstract : Modeling Instruction methods were implemented in a high school chemistry classroom over the course of two school years. Results of pretest - post test data from the Assessment of Basic Chemistry Concepts (ABCC) showed statistically significant gains. Cohen's d effect size measure was calculated, resulting in values that are considered large. The learning gains measured in this manner showed an increase in learning

Essment Of Basic

gains from the first year of implementation to the second. Other evidence of learning gains came in the form of classroom observations. The findings indicate the potential impact of using modeling instruction in chemistry.

Medicinal Chemistry has always been a tough course, a source of frustration in every school of pharmacy. Now ASHP has made both learning and teaching it much easier and more effective, with the publication of Medical Chemistry Self Assessment. Developed by Robin M. Zavod and Marc W. Harrold, authors of the highly praised textbook, Basic Concepts in Medicinal Chemistry, this Self Assessment is the only publication of its kind. A highly engaging way for pharmacy and pre-health students to

Download File PDF

Essment Of Basic

master the complexities of medicinal chemistry, it reinforces what they learn in class with practice problems and review questions which are answered at the end of the book. The Self Assessment book and its related online content are also handy teaching tools, as well as a source of new problem formats and strategies for exploring concepts from different perspectives. Zavod and Harrold's approach provides a clear translation of organic chemistry concepts into medicinal chemistry language, and includes numerous clinically relevant examples, relating medicinal chemistry to therapeutic decisions. A valuable enhancement to any medicinal chemistry text, this book will also be very helpful for students learning organic or biochemistry, as well as for practitioners who want to renew their understanding of medicinal chemistry.

Engineers who need to have a better understanding of chemistry will benefit from this accessible book. It places a stronger emphasis on outcomes assessment, which is the driving force for many of the new features. Each section focuses on the development and assessment of one or two specific objectives. Within each section, a specific objective is included, an anticipatory set to orient the reader, content discussion from established authors, and guided practice problems for relevant objectives. These features are followed by a set of independent practice problems. The expanded Making it Real feature showcases topics of current interest relating to the subject at hand such as chemical forensics and more medical related topics. Numerous worked examples in the text now include Analysis and Synthesis sections, which allow

reading experience that can be adopted on its own as the main course material. It lets students highlight, take notes, and review key vocabulary all in one place, even when offline. Seamlessly integrated videos and other rich media engage students and give them access to the help they need, when they need it. Educators can easily share their own notes with students so they see the connection between their eText and what they learn in class - motivating them to keep reading, and keep learning. MasteringChemistry is the leading online homework, tutorial, and assessment system, designed to improve results by engaging students before, during, and after class with powerful content. Instructors ensure students arrive ready to learn by assigning educationally effective content before class, and encourage critical thinking and retention with in-class resources such as Learning Catalytics(tm).
