Organizational Culture in Action: A Cultural Analysis Workbook begins by explaining theories on which organizational culture is based. It then provides "how to" guides for gathering information to help improve organizational performance. "Connections" sections present the practical value of theory and concepts discussed throughout. Based on more than 20 years of experience in using this approach with hundreds of students, the authors help students apply cultural insights to fostering diversity, supporting organizational change, making leadership more dynamic, exploring the link between ethics and culture, and making organizations more effective overall. Unique to Organizational Culture in Action are the various examples the authors have included, which are taken from their consulting experience with more than 150 organizations.

This book contains papers in the fields of engineering pedagogy education, public-private partnership and entrepreneurship education, research in engineering pedagogy, evaluation and outcomes assessment, Internet of Things & online laboratories, IT & knowledge management in education and real-world experiences. We are currently witnessing a significant transformation in the development of education and especially post-secondary education. To face these challenges, higher education has to find innovative ways to quickly respond to the new needs. There is also pressure by the new situation in regard to the Covid pandemic. These were the aims connected with the 23rd International Conference on Interactive Collaborative Learning (ICL2020), which was held online by University of Technology Tallinn, Estonia from 23 to 25 September 2020. Since its beginning in 1998, this conference is devoted to new approaches in learning with a focus on collaborative learning. Nowadays the ICL conferences are a forum of the exchange of relevant trends and research results as well as the presentation of practical experiences in Learning and Engineering Pedagogy. In this way, we try to bridge the gap between 'pure' scientific research and the everyday work of educators. Interested readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, school teachers, learning industry, further and continuing education lecturers, etc. .

Increasingly the public sector is facing a range of unique and complex challenges. As a result, human resource management is vital in changing organizations, engaging people, and in assisting in the implementation of strategies and objectives. Strategic Human Resource Management in the Public Arena focuses on the specific challenges of the public and non-profit sectors. It takes a managerial approach, focusing on how HR practices and processes can be aligned with an organization's strategic objectives, with each chapter structured around implementing or designing an HR process for an organization's unique setting and strategic priorities. Key features: • Puts the reader in the role of a manager. • Recognizes the unique perspective of public sector organizations and the growing research and theory on public sector organizations. • Includes a wealth of practice-based, problem-solving activities. This core textbook is the ideal companion for Undergraduate and Postgraduate students taking modules in SHRM or Public Sector Management.

This book consists of two titles, which are the following: Book 1: Are you nervous about your job interview? Do you have the feeling that you are not prepared to face an invasive number of questions about your accomplishments and career choices? Well, have no fear, my friend. You are at the right address. This book can guide you along. Topics that will be discussed in this book include how to make a lasting first impression, asking specific questions about your motivation, how to dress, what to bring, how to react on the phone (if applicable), how to show your interviewer that you are listening and interacting, etc. Book 2: This book will lead you in your next job interview. It will help you understand the reasons why interviewers ask specific questions and how to answer them. Being prepared for those questions can increase your chances of getting the job you want. It will also show you which questions are smart to ask your potential future employer, because, as opposed to what some people may suppose, this is an important part of the interview to show how passionate you may be about your future job. Last but not least, most people forget to follow up and simply wait for the interviewer to contact them. This is a big mistake. If you want to stand out among the crowd, it is important to follow up after the interview, and show how driven and motivated you are.

The Routledge Companion to Interdisciplinary Studies in Singing, Volume II: Education examines the many methods and motivations for vocal pedagogy, promoting singing not just as an art form arising from the musical instrument found within every individual but also as a means of communication with social, psychological, and didactic functions. Presenting research from myriad fields of study beyond music-including psychology, education, sociology, computer science, linguistics, physiology, and neuroscience-the contributors address singing in three parts: Learning to Sing Naturally Formal Teaching of Singing Using Singing to Teach In 2009, the Social Sciences and Humanities Research Council of Canada funded a seven-year major collaborative research initiative known as Advancing Interdisciplinary Research in Singing (AIRS). Together, global researchers from a broad range of disciplines addressed three challenging questions: How does singing develop in every human being? How should singing be taught and used to teach? How does singing impact wellbeing? Across three volumes, The Routledge Companion to Interdisciplinary Studies in Singing consolidates the findings of each of these three questions, defining the current state of theory and research in the field. Volume II: Education focuses on the second question and offers an invaluable resource for anyone who identifies as a singer, wishes to become a singer, works with singers, or is interested in the application of singing for the purposes of education.

Since the year 2000, there has been a statistically high proportion of head teachers leaving the profession. While there have been studies conducted to predict when this exodus would conclude, the actual reasons for why senior people are leaving their positions have not been explored so far. Schools have found replacing head teachers increasingly difficult and the inevitable leadership crisis has been well documented by both scholars and the media. The leadership crisis has been most noticeable within the Catholic Primary School sector, where statistics have consistently shown an issue with recruiting people to headship positions. This book considers the reasons for the crisis and looks at potential solutions. It identifies what the leadership crisis encompasses from the negativity of the education system (including headship accountability, the work-life balance, and salary), whilst also offsetting this with possible supporting solutions, such as the value of acting headship, succession planning and talent spotting from the beginning of a teacher's career.
