technological development, physical background and key areas. The opening chapters on the physics of light are complemented by chapters on refractive and diffractive optical elements. The internationally renowned authors present different methods of lithographic and nonlithographic fabrication of microoptics and introduce the characterization and testing of microoptics. The second part of the book is dedicated to optical microsystems and MEMS, optical waveguide structures and optical nanostructures, including photonic crystals and metamaterials. Each chapter includes exercises illustrating a sample approach to new and complex topics, making the textbook suitable for lectures on optics as part of a physics or electrical engineering course.

Water is essential to life for humans and

their food crops, and for ecosystems. Effective water management requires tracking the inflow, outflow, quantity and quality of ground-water and surface water, much like balancing a bank account. Currently, networks of ground-based instruments measure these in individual locations, while airborne and satellite sensors measure them over larger areas. Recent technological innovations offer unprecedented possibilities to integrate space, air, and land observations to advance water science and guide management decisions. This book concludes that in order to realize the potential of integrated data, agencies, universities, and the private sector must work together to develop new kinds of sensors, test them in field studies, and help users to apply this information to real problems.

" "Computerization movement" (CM) refers to a special kind of social and technological movement that promotes the adoption of computing within organizations and society. ... Through theoretical analyses, systematic empirical studies, field-based studies, and case studies of specific technologies, the book shows CMs to be driven by Utopian visions of technology that become part of the "ether" within society. The empirical studies presented here show the need for designers, users, and the media to be aware that CM rhetoric can propose grand visions that never become part of a reality and reinforce the need for critical and scholarly review of promising new technologies." --Back cover.

How To Live Your Life Without Insecurities Greetings! If you're reading this, I'm assuming that you're either a)

interested in the self-help genre or b) interested in helping yourself. Either way, I hope you get some value from the words that follow. My aim for this book wasn't to go all technical, nor act as a 'proxy-therapist'. It's written to be informational, yet relatable and easy to read. Dividing the book into '28 days, 28 ways' was done for several reasons:-it gave me a clear structure within which to write, giving clarity to my thoughts and ideas (and hopefully yours too!)-it's the sort of book you can 'dip into'. You can read it from start to finish, or you can pick and choose bits and pieces. Or, even better, you can start in the middle, finish at the start or begin at the end. Here Is A Preview Of What You Will Learn... Self-Esteem - What Is It ? Self-Confidence - What Is It ? One year ago, I became a missing person. I left everything behind-family, friends, school. It seemed like a good idea at the time. My only option, really, until I realized running from a police officer isn't as easy as I thought it would be. It's been exactly three-hundred and sixty-five days since I left home, but I'm finally ready to take the step I should have taken a year ago. I'm done hiding. I'm done running. I'm going to take my life back. It was supposed to be easy. A meeting with Jason Pierce, a private investigator, was set up for me. All I had to do was go to him, let him do his thing, and then I could go home, or so I thought. That is, until I met Jason and things got ... complicated.

Zons, on the banks of the Rhine, a young woman is found hanging from a parapet, raped and mutilated. A month later, another maiden falls prey. Bastian M ü hlenberg, head of the City Guard, is determined to decipher the murderer's gruesome code, unaware that he and the woman he loves are in the killer's sights. With the help of an old psychic, a priest, and the stars above, M ü hlenberg must solve the “ fatal puzzle ” before it's too late. Present day: Journalist Emily Richter is thrilled when she's assigned a series of articles about the historic Zons killings. However, right before her stories are to be published, a young woman's body is found hanging from a city tower—grossly maimed and wearing a linen gown, like her medieval predecessors. Detective Oliver Bergmann leads the investigation, tapping the knowledge of the attractive young journalist. Working together—and

The first edition published in 2010. The response was encouraging and many people appreciated a book that was dedicated to quality management in construction projects. Since it published, ISO 9000: 2008 has been revised and ISO 9000: 2015 has published. The new edition will focus on risk-based thinking which must be considered from the beginning and throughout the project life cycle. There are quality-related topics such as Customer Relationship, Supplier Management, Risk Management, Quality Audits, Tools for Construction Projects, and Quality Management that were not covered in the first edition. Furthermore, some figures and tables needed to be updated to make the book more comprehensive.

The first full-length collection of essays on the poetry of Carol Ann Duffy. Duffy's poetry is both respected by academics, and widely read and enjoyed by both children and adults. Approaches Duffy's work from a variety of literary theoretical perspectives, including feminism, masculinity, national identity and post-structuralism. Situates Duffy's work in relation to current debates about the state, value and social relevance of contemporary British poetry. Will become the benchmark anthology on Duffy.
