Nowadays, chessplayers spend almost all their free time preparing openings, and rarely spend the time necessary to perfect the vitally important technique of calculating. Regular training in solving and playing out endgames studies is a good recipe for eliminating that shortcoming. This training is directed at developing resourcefulness, fantasy (in chess, these qualities are called "combinative acuity"), and the readiness to sacrifice material, in pursuit of the goal - winning! How do we develop good habits of winning endgame play? considered a likely place for an enemy invasion. There were days of great tension, even terror, such as on the day of the first bombardment of the coast by the German Navy, and the day of Zeppelin attacks and dog fights out to sea when the flimsy planes of a fledgling RAF took on the Red Baron and his comrades. This unique study is based largely on original archive material, much of it never before published in book form. It is accompanied by many rare and fascinating photographs that show the day-to-day life of the people who lived in the many settlements on the coast and just inland. In addition, this book also gives an itinerary for a walk along the 46 mile stretch of the coast from Hunstanton to Cromer, taking in many of the places discussed and giving views that are exactly the same as they were 100 years ago.
