In Volume 2 of the Wonders of the Human Body series, Dr. Tommy Mitchell covers the intricate design of both the cardiovascular system, consisting of the blood, blood vessels, and heart, as well as the respiratory system that focuses on the transportation of oxygen through the body. From the level of the cells to the organs themselves, you will examine these systems in depth. In the Cardiovascular & Respiratory Systems, prepare to discover the incredible design of the human heart, including: The incredible design of the human heart and how it is really "two pumps in one!" How blood moves through an incredible network of arteries and veins What "blood pressure" is and the marvelous systems that help regulate it How the respiratory system allows us to get the "bad air out " and the "good air in" Along the way, we will see what happens when things go wrong. We will also suggest things to do to keep the heart and lungs healthy. Although the world insists that our bodies are merely the result of time and chance, as you examine the human body closely, you will see that it cannot be an accident. It can only be the product of a Master Designer.

7th Grade Science Multiple Choice Questions and Answers (MCQs): Quizzes & Practice Tests with Answer Key PDF (Grade 7 Science Worksheets & Quick Study Guide) covers exam review worksheets for problem solving with 2300 solved MCQs. "7th Grade Science MCQ" with answers covers basic concepts, theory and analytical assessment tests. "7th Grade Science Quiz" PDF book helps to practice test questions from exam prep notes. 7th Grade Science Multiple Choice Questions and Answers PDF download, a book covers solved quiz questions and answers on chapters: Atoms and atom model, atoms molecules and ions, digestive system, dispersion of light, electric circuits, electrical circuits and electric currents, elements and compounds, energy resources: science, feeding relationships and environment, forces effects, heat transfer, human transport system, importance of water, investigating space, mixtures, particle model of matter, physical and chemical changes, reproduction in plants, respiration and food energy, simple chemical reactions, solar system, solutions, sound waves, transportation in plants workbook for middle school exam's papers. "7th Grade Science Quiz Questions and Answers" PDF download with free sample test covers beginner's questions and mock tests with exam workbook answer key. 7th grade science MCQs book, a quick study guide from textbooks and lecture notes provides exam practice tests. "7th Grade Science Worksheets" PDF with answers covers exercise problems solving in self-assessment workbook from science textbooks with following worksheets: Worksheet 1: Atoms and Atom Model MCQs Worksheet 2: Atoms Molecules

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Volume One, The Musculoskeletal System, opens with the building blocks of your body--the cells. Your body is built from many kinds of cells and tissues, and you will learn how they work. Even the bones and muscles that give you strength and speed depend on many types of cells. This book will: Show you the ins and outs of the bones in your skeleton and how they function Give detail as to how your marvelous muscles move you Provide a detailed glossary in the back for quick reference! Throughout the book you will learn things to do to keep your body healthy. But in a fallen, cursed world things are bound to go wrong. We will look at what happens when disease or injury affects bones and muscles. Volume Two, Cardiovascular and Respiratory Systems. From the level of the cell to the organs themselves, we will examine these systems in depth. Here you will learn: The incredible design of the human heart and how it is really "two pumps in one!" How blood moves through an incredible network of arteries and veins What "blood pressure" is and the marvelous systems that help regulate it How the respiratory system allows us to get the "bad air out " and the "good air in" Along the way, we will see what happens when things go wrong.

We will also suggest things to do to keep the heart and lungs healthy. Although the world insists that our bodies are merely the result of time and chance, as you examine the human body closely, you will see that it cannot be an accident. It can only be the product of a Master Designer.

How long is a nerve cell? How are our lungs like a train station? We answer these questions and much more in our second resource on the human body. Curriculum-based material written in an easy-to-understand way makes this a hit for teachers and students alike. Loaded with information on the brain, spinal cord and nerves, students will learn the main parts of the nervous system and how each works. Also investigate the organs of the five senses, and then take a trip around the respiratory system! Find out exactly where air goes when we breathe it in, and then out. Reading passages, comprehension questions, hands-on activities and color mini posters are provided. Also included: Crossword, Word Search, Test Prep and Final Quiz. All of our content is aligned to your State Standards and are written to Bloom's Taxonomy and STEM initiatives.
