## ~~The New Fluid Credit Card—Give Yourself a Little More Time~~

While any vehicle fluid can be changed, flushing is highly recommended for coolant, brake fluid and transmission fluid. To determine if a fluid needs to be flushed, use a clean white paper towel to check if your fluids are simply dirty and need to be changed, or if they are tainted or contaminated. If the latter, they need to be flushed.

BabyCentre UK~~

Edema is swelling caused by excess fluid trapped in your body's tissues. Although edema can affect any part of your body, you may notice it more in your hands, arms, feet, ankles and legs. Edema can be the result of medication, pregnancy or an underlying disease — often congestive heart failure, kidney disease or cirrhosis of the liver.

~~Edema — Symptoms and causes — Mayo  
Clinic~~

As you breathe, the alveoli take in oxygen and release carbon dioxide. It is the normal exchange of gasses in the body.

# Get Free If The Fluid In Your Battery Is Frozen And

However, there are instances when instead of air, fluid gets inside the alveoli. It causes insufficient oxygen in the bloodstream.

## ~~Fluid in Lungs Causes, Symptoms and Treatment~~

Checking your vehicle's brake fluid is a quick way to tell if your braking system is in good condition or if it requires some attention. Locate the brake fluid reservoir  
On most vehicles, the brake fluid reservoir is located near the front of the firewall under the hood, but reference your owner's manual for the reservoir's location in your specific vehicle if you're unsure.
