10.2 Informatica PowerCenter Transformation Guide

The PowerCenter Integration Service compares the transformation port values to lookup source field values based on the SOQL queries. A

File Type PDF

Informatica

Salesforce

Lookup transformation differs from a

Lookup transformation.

For example, the Salesforce

Lookup transformation returns all rows that match the lookup query condition.

Introduction of
Informatica

PowerCenter. The
Informatica

PowerCenter is
defined as ETL

(extraction,
transformation,
and loading)

tool that is
widely used for
creating the

File Type PDF Informatica

data warehouses
which are used
in industries.
The Informatica
PowerCenter has
various
components that
are used to
extract the data
from the source,
then convert the
data into some
form as per
business

File Type PDF Informatica

Powercenter and
then load the
data at the
destination data
warehouse.
