The concentration of private power over media has been the subject of intense public debate around the world. Critics have long feared waves of mergers creating a handful of large media firms that would hold sway over public opinion and endanger democracy and innovation. But others believe with equal fervor that the Internet and deregulation have opened the media landscape significantly. How concentrated has the American information sector really become? What are the facts about American media ownership? In this contentious environment, Eli Noam provides a comprehensive and balanced survey of media concentration with a methodical, scientific approach. He assembles a wealth of data from the last 25 years about mass media such as radio, television, film, music, and print publishing, as well as the Internet, telecommunications, and media-related information technology. After examining 100 separate media and network industries in detail, Noam provides a powerful summary and analysis of concentration trends across industries and major media sectors. He also looks at local media power, vertical concentration, and the changing nature of media ownership through financial institutions and private equity. The results reveal a reality much more complex than the one painted by advocates on

either side of the debate. They show a dynamic system that fluctuates around long-term concentration trends driven by changing economics and technology. Media Ownership and Concentration in America will be essential reading and a trove of information for scholars and students in media, telecommunications, IT, economics, and the history of business, as well as media industry professionals, business researchers, and policy makers around the world. Critics and defenders of media trends alike will find much that confirms and refutes their world view. But the next round of their debate will be shaped by the facts presented in this book.

A richly insightful account of one of the most significant transformations in the world today. Dheeraj Sinha's intelligence vividly illuminates the intersection of culture and commerce in New India. Adam Morgan Founder eatbigfish Among the many books I have read on the cultural evolution taking place in India, this is perhaps the most insightful. It does not just map mindset changes; it does so with the certainty of a person who has lived the changes as much as he has witnessed them. Every marketer should keep this book on his office desk as a ready reckoner. Ranjan Kapur Country Manager - India WPP India in many ways is a "Nation of Nations." So much heterogeneity and hence complexity in understanding consumers and consumerism.

Dheeraj has done a commendable job in peeling off the layers from the onion-creating frameworks and providing very relatable examples to understand the culture. For instance, Dheeraj has used Bollywood as an effective mirror to portray societal changes. Consumer India is a must-read for those who want to understand the cultural evolution of India with its nuances. Rajesh Jejurikar Chief Executive - Automotive Division Mahindra & Mahindra Ltd. A labor of love. For years, I have marveled at how Dheeraj's inquisitive brain continuously churns away to make meaning of everything he observes. His writing simultaneously reflects him as a "sutradhaar" telling the captivating story of a changing India, even as it does so with the unbiased and expert credentials of the "computerji" he describes here. Dheeraj insightfully marries the rapid changes he chronicles with the assimilative fabric of India; where "and" trumps "or." Against the cliché "change is the only constant," he underlines that in India, change works with the constant. Enjoy the ride on Dheeraj's time machine! Using big data analytics, this research covers top Chinese home appliance brands, including LCD TV, refrigerator, washing machine and air conditioner, with following analysis dimensions: brand ranking by the number of items available on online stores, ranking by sales, number of times online users mention about a particular brand, brand preferences, factors affecting purchase, as well as online shoppers' comments and user analysis. All those dimensions help build a massive social media database which can more accurately reflect consumer needs in China.

Modern technology and innovation are vital to the success of all companies, be they hi-tech firms or companies seemingly unaffected by technology and innovation; whether established firms or business start-ups. This book focuses on understanding technology as a corporate resource, covering product development, design of systems and the managerial aspects of new and high technology. Topics investigated include: the internal organization of high technology firms the management of technology in society managing innovation dilemmas and strategies. The wide-ranging experience of the teachers and experts contributing to this book has
