Weight: 250g The 1977 Gossen Profisix (in US Luna-Pro sbc) is a professional "system" exposure meter that can be fitted with a range of electrically connected accessories offering additional measurement facilities, including flash, enlarger metering, and colour temperature. The "Profi-System" line continued and ended with the Mastersix.

Gossen Profisix / Lunasix F - Camera-wiki.org - The free ...

Gossen Lunasix 3, although built around the early '70, is a very capable hand-held meter even by today standards. It beats my Canon 20D built-in meter in terms of actual low-light performance by 5 stops. Unfortunately it belongs to one of these designs, that relied on mercury battery voltage staying constant throughout their life and mercury ...

GOSSEN LUNASIX MANUAL PDF - Ru 7th

Manual and automatic exposure metering systems integrated into the camera have long since been standard equipment – for professional cameras too. Thanks to innovations such as matrix metering and a pre-flash function for determining reflection characteristics, current TTL measuring systems (TTL = through the lens) are ideally suited for assuring good exposure in particular with dynamic ...

Lunasix 3 manual < Other stuff < Info < Peter Marquis-Kyle

Handier than my Gossen Luna Pro I use a 1955 Rolleicord V when I shoot film (Ilford HP5 - 400). I like to carry as few things as possible - just the camera - and I would often leave my light-meter behind when I went out to shoot, relying on having memorized the " Sunny 16 " rule to determine my exposure settings. I bought this meter after trying the free version. I always have my iPhone in ...
