Written for all types of ITA programsan independent study course, a brief workshop, or extensive trainingthis versatile text provides essential information for ITAs to develop strong teaching skills that ensure effective communication in the undergraduate classroom. The authors take the perspective that incoming ITAs are responsible for their own learning and teaching style. Each of the texts ten units includes work on English proficiency, teaching skills, and cultural awareness. Each unit centers around a common rhetorical teaching task in U.S. university classrooms: introducing oneself, introducing a syllabus, explaining a visual, defining a term, teaching a process, fielding questions, explaining complex topics at a basic level, presenting information over several class periods, and leading a discussion. Undergraduate textbook materials for fifteen academic fields are included in the appendix to provide ITAs with content relevant for practicing teaching and language skills. Because ITA programs vary in structure and number of training hours, the authors include a To the Instructor section, which is full of recommendations for the many ways the text can be used.

The Insight Meditation twelve-month correspondence course is an unparalleled home immersion in vipassana meditation and philosophy, presented by the cofounders of the Insight Meditation Society, Sharon Salzberg and Joseph Goldstein. Cultivate the sacred environment of a retreat in your own home, with the help of a personal instructor. Includes twelve sequential lessons, an 88-page workbook with interactive exercises, and more.

Make the Grade in AS Biology with Human Biology has been specially written to give students comprehensive exam support for senior secondary level Biology and Human Biology. It is a comprehensive revision guide for students that includes a bank of activities and questions for use throughout the course, with exam questions, including synoptic questions, to help students fully prepare for examinations.

A course to prepare students for the IELTS test at a foundation level (B1). Combines contemporary classroom practice with topics aimed at young adults

Contact your education consultant for access codes and conditions.

The Nelson Modular Science series is made up of three books divided into single, double and triple award modules presented in an accessible format. Book 1 covers the six single award and one coursework modules; Book 2 contains six double award modules; and Book 3 covers the six triple award modules. Each module is covered in self-contained units. This teacher's file includes practical support sheets and addresses Sc1 investigations. Works sheets are provided to integrate the use of ICT throughout science. Additional GCSE-style questions and modular tests should enhance learning and recall of information.

Written to the highest achievement standard, this visually engaging series brings Biology to life with clear language and relevant examples. New case studies and Scientific Literacy boxes in every chapter help students to connect with the study of Biology to the real world.
