Prev. ed. published under title: Encyclopedia of global warming and climate change.

This report by the Department of Housing and Urban Development (HUD) Office of Policy Development and Research, Energy Task Force builds upon HUD¿s initial report -- submitted in August 2006 -- and describes the initiatives that HUD has undertaken to address rising energy costs in federally assisted housing. Contents: (A) Introduction: Estimated Energy Savings; Selected Accomplishments; Congressional Actions Impacting HUD; (B) Energy Costs and Affordable Housing; (C) HUD¿s Energy Strategy; (D) Progress to Date; (E) Moving to Green Building; (F) Energy Reduction Goals and Incentives; Appendixes. Tables.

This book breaks new ground in the studies of green transition. It frames the ongoing transformation in terms of a "battle of modernities" with the emerging vision of ecomodernity as the final destination. It also offers a systematic exploration of the potential for extensive transformation of carbon-intensive sectors - with a focus on energy and transport - towards a low or post-carbon economy. The book does so in a comparative perspective, by pointing to a diversity of techno-economic and institutional solutions in the mature Western economies, and in the rapidly growing East and developing South. The contributors highlight a broad spectrum of available alternatives as well as illuminate conflicting interests involved. They also demonstrate how solutions to the climate challenge require parallel technological and governance innovation. The book advocates a new, overarching vision and agenda of ecomodernity - based on a synergistic paradigm-shift in industry, politics and culture - to trigger and sustain the ecological innovation necessary to tip development in a green direction. This vision cannot be monolithic; rather, it should reflect the diverse interests and conditions of the global population. This book is aimed at researchers and postgraduate students of energy, transport, environmental and climate policies, as well as development, environment, innovation and sustainability.
