An erotic paranormal romance... Seductive and lethal vampire, Léopold Devereoux, returns to the Big Easy to find a killer. His search leads him to a beautiful and mysterious woman, who awakens desires and emotions that he's long fought to keep buried. After centuries of self-imposed solitude, the billionaire philanthropist struggles to restrain his growing thirst for the intriguing, lovely female who's captured his attention. Laryssa Theriot, an antiques proprietor in the Vieux Carré, agrees to help the commanding yet debonair stranger, who seeks her assistance. She withholds her secret abilities, afraid to trust the man who threatens to unleash her darkest fantasies. All the while, Léopold consumes her thoughts, testing her limits and bringing her to new levels of ecstasy. As the menacing force that has stalked Laryssa for years finally catches up to her, she submits, putting her life into the hands of the dominant vampire who offers his protection. Deep in the heart of New Orleans, they embark on a perilous adventure, forced to search for an ancient sacrificial relic that they hope will save their lives. As they face formidable challenges, Léopold and Laryssa surrender to the passionate intimacy that possesses them. After hundreds of years of denying himself love, will Léopold bond to the woman who has begun to crack the impenetrable shell around his heart? As evil draws near, will Laryssa survive the demon that has come to take her soul? Warning: This book contains several erotic love scenes and is intended for adult readers only.

Maintaining a question-and-answer format, this second edition provides simplified means of solving nearly 200 practical problems that confront engineers involved in the planning, design, operation and maintenance of steam plant systems. Calculations pertaining to emissions, boiler efficiency, circulation and heat transfer equipment design and performance are provided. Solutions to 70 new problems are featured in this edition.

The Complete Guide to Memory Mastery will help you think more effectively to achieve long term success. The easy and effective techniques mentioned in this book will help you get rid of post-it-notes and to-do lists to remember names, faces and even phone numbers! The Author also introduces the link and peg systems for effortless everyday living. Some of the fascinating memory aids here will teach you how to: Develop Your memory Think effectively Strengthen your will power Make more money With these proven techniques,you will enhance your memory and unlock the Secrets of Mind Power.

The office of notary public has a long and proud history in our society. Their work is rarely glamorous, but it is so important that the highest courts in the nation routinely accept properly notarized documents as evidence in legal matters. In fact, the law governing notaries gives them the same mission as sworn law enforcement officers, "to serve and protect."

The forthcoming marriage of Venetia, eldest daughter of the Duke of Southport, and 'Beauty' Winchmore is the talk of London society, and a match which has the full support of Venetia's parents. But just weeks before the wedding Venetia cries off - unable to accept that her husband-to-be will forbid her to study medicine. And within weeks of her shameful behaviour her father is dead and she is ostracised from her family, left with a tiny allowance to carry on with the 'cause' and try to qualify as a doctor. Meanwhile at Morland Place George's new wife is whittling away at his fortune during the worst agricultural recession of the century. His sister, Henrietta, apparently safely married off to the Reverend Fortescue, has realised her marriage is a hollow pretence of conjugal bliss and falls heavily in love with a local squire - a passion which seems destined to be unfulfilled. Another wonderful piece of fictionalised history which brings period and place to three-dimensional and colourful life.

The production of doubled haploids has become a necessary tool in advanced plant breeding institutes and commercial companies for breeding many crop species. However, the development of new, more efficient and cheaper large scale production protocols has meant that doubled haploids are also recently being applied in less advanced breeding programmes. This Manual was prepared to stimulate the wider use of this technology for speeding and opening up new breeding possibilities for many crops including some woody tree species. Since the construction of genetic maps using molecular markers requires the development of segregating doubled haploid populations in numerous crop species, we hope that this Manual will also help molecular biologists in establishing such mapping populations. For many years, both the Food and Agriculture Organization of the United Nations (FAO) and the International Atomic Energy Agency (IAEA) have supported and coordinated research that focuses on development of more efficient doubled haploid production methods and their applications in breeding of new varieties and basic research through their Plant Breeding and Genetics Section of the Joint F AO/IAEA Division of Nuclear Techniques in Food and Agriculture. The first F AO/IAEA scientific network (Coordinated Research Programme - CRP) dealing with doubled haploids was initiated by the Plant Breeding and Genetics Section in 1986.

The updated Third Edition of ICU Recall facilitates rapid review and memorization with a concise question and answer format. Topics include ethics, pharmacology, radiology, and, especially, ICU-focused questions. You'll find complete coverage of multi-system pathologic processes such as malnutrition, immunosuppression, neoplasia, and manifestations of infection, as well as patient-specific issues such as trauma, burns, transplants, and pediatric problems. This edition includes new techniques for cardiac support, renal support, and immunosuppression and thoroughly updated information on pharmacology, radiology, and monitoring. The enclosed bookmark helps readers self-test by covering the answers.

Designed to accompany Microelectronic Circuits, Eighth Edition, by Adel S. Sedra, K. C. Smith, Tony Chan Carusone and Vincent Gaudet, Laboratory Explorations invites students to explore the realm of real-world engineering through practical, hands-on experimentation. Taking a learning-by-doing approach, it presents labs that focus on the development of practical engineering skills and design practices. Experiments start from concepts and hand analysis, and include simulation, measurement, and post-measurement discussion components. A complete solutions manual is also available for adopting instructors.

(Musician's Guide Home Recordg). The best recordings are for nothing if the mix doesn't present those tracks in the best possible way and this book is all about how to make mixes that pull the listener in. It's not just about the technology, but the art of mixing as well. Written in a clear, practical, non-intimidating style, topics include: * Feel vs. perfection * The importance of the arrangement for mixing * Tailoring material for your audience * Monitoring and acoustics * Software mixer architecture * Unique aspects of mixing with digital audio * How to use plug-ins * Integrating external hardware with computers, the "12-step program" to create great mixes * Panning techniques * Equalization * Dynamics processing * Time-based effects * Placing effects in the right order * How to use automation * Hardware control surfaces * Mixing with virtual instruments * Adding expressiveness in the mix * Using ReWire, beyond conventional mixing techniques * Mixing and MIDI, and much more Far from being a laundry list of mixing techniques, How to Create Compelling Mixes places equal emphasis on the art of mixing. With copious illustrations and featuring the judicious use of sidebars to give details on selected topics for those who want to know "why" as well as "how," How to Create Compelling Mixes is essential reading about how to get the most out of this crucial processor for mixing and mastering.

The application of radiation to medical problems plays an ever-increasing role in diagnosis and treatment of disease. It is essential that medical physicists have the knowledge, understanding and practical skills to implement radiation protection as new techniques are developed. Practical Radiation Protection in Healthcare provides a practical guide for medical physicists and others involved with radiation protection in the healthcare environment. The guidance is based on principles set out in current recommendations of the International Commission for Radiological Protection and methods developed by a variety of professional bodies. Written by practitioners experienced in the field this practical reference manual covers both established techniques and new areas of application. This new edition has be fully revised and updated to cover new requirements linked to the increased knowledge of radiation effects, and the development of new technology. Each specialist area is covered in a separate chapter to allow easy reference with individual chapters being assigned to different types of non-ionising radiations. Tabulated data is included to allow the reader to carry out calculations for situations encountered frequently without reference to further texts.
