On October 23, 2001, Apple Computer, a company known for its chic, cutting-edge technology -- if not necessarily for its dominant market share -- launched a product with an enticing promise: You can carry an entire music collection in your pocket. It was called the iPod. What happened next exceeded the company's wildest dreams. Over 50 million people have inserted the device's distinctive white buds into their ears, and the iPod has become a global obsession. *The Perfect Thing* is the definitive account, from design and marketing to startling impact, of Apple's iPod, the signature device of our young century. Besides being one of the most successful consumer products in

decades, the iPod has changed our behavior and even our society. It has transformed Apple from a computer company into a consumer electronics giant. It has remolded the music business, altering not only the means of distribution but even the ways in which people enjoy and think about music. Its ubiquity and its universally acknowledged coolness have made it a symbol for the digital age itself, with commentators remarking on "the iPod generation." Now the iPod is beginning to transform the broadcast industry, too, as podcasting becomes a way to access radio and television programming. Meanwhile millions of Podheads obsess about their gizmo, reveling in the personal soundtrack it offers them, basking in the social

cachet it lends them, even wondering whether the device itself has its own musical preferences. Steven Levy, the chief technology correspondent for Newsweek magazine and a longtime Apple watcher, is the ideal writer to tell the iPod's tale. He has had access to all the key players in the iPod story, including Steve Jobs, Apple's charismatic cofounder and CEO, whom Levy has known for over twenty years. Detailing for the first time the complete story of the creation of the iPod, Levy explains why Apple succeeded brilliantly with its version of the MP3 player when other companies didn't get it right, and how Jobs was able to convince the bosses at the big record labels to license their music for Apple's groundbreaking iTunes Store.

(We even learn why the iPod is white.) Besides his inside view of Apple, Levy draws on his experiences covering Napster and attending Supreme Court arguments on copyright (as well as his own travels on the iPod's click wheel) to address all of the fascinating issues -- technical, legal, social, and musical -- that the iPod raises. Borrowing one of the definitive qualities of the iPod itself, *The Perfect Thing* shuffles the book format. Each chapter of this book was written to stand on its own, a deeply researched, wittily observed take on a different aspect of the iPod. The sequence of the chapters in the book has been shuffled in different copies, with only the opening and concluding sections excepted. "Shuffle" is a hallmark of the digital age --

From the introductory remarks. I do not purpose to attempt here any comparisons of the languages shown. I have neither the time nor the ability to do so.

Fortunately the language-specimens were obtained before famine came upon us, and now that the printing is completed, I issue them with the briefest possible note. I will only mention one or two salient features in the classification of the non-Aryan tribes of these territories, which the specimens render self-evident. It is very clear that most of the aboriginal tribes of the Central Provinces and several of those of Western Bengal (including in these latter the Dangars, Oraons of Chota Nagpore, Paharies of Rajmehal, and Khonds of Orissa) are radically allied to the Dravidians.

Intermixed with these tribes, but speaking a language quite without affinity to the Dravidian tongues, are the tribes which I call Kolarian, forming a minority among

the aborigines of the Central Provinces, but a great majority among those of Western Bengal. Throughout the western borders of Bengal, and all over the Chota Nagpore country, these people are very numerous and prolific, and form large, settled, and civilised communities among the best of her Majesty's Indian subjects. Strange as it may seem, I believe that their very fully developed language has not yet been found to have any affinity with any other groups of language whatever, except with one now rapidly dying-out tongue, far away on the eastern side of the Bay of Bengal, the Mon or Talain of Pegu, with which some affinities are, I think, apparent. The specimens numbered 9 and 10 make it clear that all the non-Aryan
