and feel and think and write, began to struggle to process an event unimaginable before, and even after, it happened. The work of journalists appeared immediately, in news reports, commentaries, and personal essays. But no single collection has yet recorded how New York writers of fiction, poetry, and dramatic prose have responded to 9/11. Now, in *110 Stories*, Ulrich Baer has gathered a multi-hued range of voices that convey, with vivid immediacy and heightened imagination, the shock and loss suffered in September. From a stunning lineup of 110 renowned and emerging writers—including Paul Auster, Lynne Sharon Schwartz, Edwidge Danticat, Vivian Gornick, Phillip Lopate, Dennis Nurkse, Melvin Bukiet, Susan Wheeler—these stories give readers not so much an analysis of what happened as the very shape and texture of a city in crisis, what it felt like to be here, the external and internal damage that the city

and its inhabitants absorbed in the space and the aftermath of a few unforgettable hours. As A.M. Homes says in one of the book's eyewitness accounts, "There is no place to put this experience, no folder in the mental hard drive that says, 'catastrophe.' It is not something that you want to remember, not something that you want to forget." This collection testifies to the power of poetry and storytelling to preserve and give meaning to what seems overwhelming. It showcases the literary imagination in its capacity to gauge the impact of 9/11 on how we view the world. Just as the stories of the World Trade towers were filled with people from all walks of life, the stories collected here reflect New York's true diversity, its boundless complexity and polyglot energy, its regenerative imagination, and its spirit of solidarity and endurance. Argues the position that more guns mean less crime, presenting an analysis of FBI crime statistics that disprove many commonly-held assumptions about gun control and its crime-fighting efficacy

For years proposals for gun control and the ownership of firearms have been among the most contentious issues in American politics. For public authorities to make reasonable decisions on these matters, they must take into account facts about the relationship between guns and violence as well as conflicting constitutional claims and divided public opinion. In performing these tasks, legislators need adequate data and research to judge both the effects of firearms on violence and the effects of different violence control

policies. Readers of the research literature on firearms may sometimes find themselves unable to distinguish scholarship from advocacy. Given the importance of this issue, there is a pressing need for a clear and unbiased assessment of the existing portfolio of data and research. Firearms and Violence uses conventional standards of science to examine three major themes - firearms and violence, the quality of research, and the quality of data available. The book assesses the strengths and limitations of current databases, examining current research studies on firearm use and the efforts to reduce unjustified firearm use and suggests ways in which they can be improved.

what the scientific literature reveals about the likely effects of various gun laws. In this second edition of an earlier work, the authors add five gun policies to the 13 examined in the original analysis and expand the study time frame to incorporate a larger body of research. With those adjustments, the authors synthesize the available scientific data on the effects of 18 policies on firearm deaths, violent crime, the gun industry, defensive gun use, and other outcomes. By highlighting where scientific evidence is accumulating, the authors hope to build consensus around a shared set of facts that have been established through a transparent, nonpartisan, and impartial review process. In so doing, they also illuminate areas where more and better information could make important contributions to establishing fair and effective gun policies.

The book includes an analysis of the constitutionality of many recommended policies and data from a national public opinion poll that reflects support among the majority of Americans—including gun owners—for stronger gun policies.

"Dr. Miguel Faria's journey into politics and the public health and gun control movements began when, as editor of the Journal of the Medical Association of Georgia, he studied the problem of gun violence and discovered the gun research conducted by the medical establishment was not scientific research as claimed, but politicized, result-oriented propaganda designed to bolster the preordained conclusion that guns should be eradicated from the general population. Faria and three other experts testified before a congressional subcommittee, exposing the pseudoscience of the gun

research conducted by the Center for Disease Control (CDC) and proposing the elimination of funds for such research. Congress agreed and passed the Dickey Amendment, restricting CDC gun research that advocates for gun control. Faria relates his adventures during his stint "within the belly" of the public health establishment *f f , , f , , " f f , , f , , € f f , , f , , "* that is, his appointment by President George W. Bush as a member of a grant review committee at the National Center for Injury Prevention and Control (NCIPC) of the CDC, the very institution he had criticized for nearly a decade! He criticizes some of the methodology used by the NCIPC and militates for a more rigorous scientific process for approval of grants in the area of injury prevention. He exposes specific flaws in several gun violence studies that attempted to link lawful gun ownership to violent crime. He argues that gun violence

is not merely a consequence of "easy gun availability," but due to the cycle of government dependency, broken families, the failure of public education, and the cultural disintegration that has been taking place for decades, particularly in the poorer southern states, and for which the federal government welfare policies have been largely responsible. *America, Guns, and Freedom* outlines why the Second Amendment and armed self-defense are still needed in modern society, debunks the arguments that the U.S. should follow the path of European social democracies by enforcing draconian gun control, and expounds on how civilian disarmament in Australia and Great Britain, despite media hype, has not decreased violent crime in those countries. In *America, Guns, and Freedom*, the author warns us of the five essential ingredients required for the creation and sustenance of tyrannical governments, one of which

has been civilian disarmament via gun registration followed by gun bans and confiscation. Faria discusses mass shooting incidents and the role of mental illness. Special attention is given to the problem of how media sensationalism may encourage deranged individuals and madmen to become mass shooters seeking celebrity status, even in death. While gun control advocates decry America's "gun culture," Faria informs us of the significant role that this "gun culture" played in saving England during World War II. American traditions have been and remain beacons of liberty, and this is most evident in America, Guns, and Freedom. Totalitarian governments that deny their citizens the right to keep and bear arms are a threat to life, liberty, property, and the pursuit of happiness."

States is besieged by firearms violence. Each year, some 30,000 people die by gunfire. Over the course of its history, the nation has witnessed the murders of beloved public figures; massacres in workplaces and schools; and epidemics of gun violence that terrorize neighborhoods and claim tens of thousands of lives. Commanding majorities of Americans voice support for stricter controls on firearms. Yet they have never mounted a true national movement for gun control. Why? *Disarmed* unravels this paradox. Based on historical archives, interviews, and original survey evidence, Kristin Goss suggests that the gun control campaign has been stymied by a combination of factors, including the inability to secure patronage resources, the difficulties in articulating a message that would resonate with supporters, and strategic decisions made in the name of effective policy. The power of the so-called gun lobby

has played an important role in hobbling the gun-control campaign, but that is not the entire story. Instead of pursuing a strategy of incremental change on the local and state levels, gun control advocates have sought national policies. Some 40% of state gun control laws predate the 1970s, and the gun lobby has systematically weakened even these longstanding restrictions. A compelling and engagingly written look at one of America's most divisive political issues, *Disarmed* illuminates the organizational, historical, and policy-related factors that constrain mass mobilization, and brings into sharp relief the agonizing dilemmas faced by advocates of gun control and other issues in the United States.

University of Bonn, language: English, abstract: The aim of this term paper is to demonstrate the important role that collective identity formation has played for "Moms Demand Action" in tackling the issue of gun control. Therefore, the key research question underlying this term paper is: what is the function of collective identity in the Moms Demand Action movement? The killing of 20 school children by a gunman in Newtown, Connecticut on December 14, 2012, brought home the issue of gun-related violence to many Americans. The event sparked the emergence of Moms Demand Action, a grass-root movement for stricter gun laws, initiated by Shannon Watts, mother of five children. The goal of Moms Demand Action is to draw public attention to the issue of gun violence and to promote legislative solutions to the problem. The group does this by redefining the issue of gun control as an

Few schisms in American life run as deep or as wide as the divide between gun rights and gun control advocates where the debate is largely defined by forceful rhetoric rather than substantive analysis. This text explores the gun-control options of the most heavily armed democracy in the world.
