Risk Vs. Return. One of the more basic relationships in investing is between risk and reward. Investments that offer potentially high returns are accompanied by higher risk factors. It is up to you to decide how much risk you can assume. This is why having a plan is essential. It keeps in perspective the risk and return trade off.

From the authors: See the Invisible Hand. Understand Your World. That's the tagline of Modern Principles and our teaching philosophy. Nobel laureate Vernon Smith put it this way: At the heart of economics is a scientific mystery... a scientific mystery as deep, fundamental and inspiring as that of the expanding universe or the forces that bind matter... How is order produced from freedom of choice? We want students to be inspired by this mystery and by how economists have begun to solve it. Thus, we show how markets interconnect and respond in surprising ways to changes in resources and preferences. Consider, for example, how markets respond to a reduction in the supply of oil. Of course, the

price of oil increases giving consumers an incentive to use less and suppliers an incentive to discover more. But an increase in the price of oil also encourages Brazilian sugar cane farmers to devote more of their production to ethanol and less to sugar thereby driving up the price of sugar. An increase in the price of sugar means a reduction in the quantity of candy demanded. So one way the market responds to a reduction in the supply of oil is by encouraging consumers to eat less candy! In analyses like this, we teach students to see the invisible hand and in so doing to understand their world. Similarly, we offer a unique and simple proof of the amazing invisible hand theorem that without any central direction competitive markets allocate production across firms in a way that minimizes aggregate costs! To understand their world students must understand when self-interest promotes the

The Contrarian Investor's Thirteen focuses on the basics of how people can improve their financial returns by themselves, reducing their dependence of costly brokers and advisors.

Doing well with money isn't necessarily about what you know. It's about how you behave. And behavior is hard to teach, even to really smart people. Money—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don't make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your
