The volume *The Italian Method of la drammatica: its Legacy and Reception* includes the long and complex investigation to identify the Italian acting-code system of the *drammatica* used by nineteenth-century Italian actors such as Adelaide Ristori, Giovanni Grasso, Tommaso Salvini, Eleonora Duse. In particular, their acting inspired Stanislavsky who reformed twentieth-century stage. The declamatory code of the *drammatica* was composed by symbols for notation of voice and gesture which Italian actors marked in their prompt-books. The discovery of the *drammatica*'s code sheds new light on nineteenth-century acting. Having deciphered the phonetic symbols of the code, Anna Sica has given birth an investigation with a group of outstanding scholars in an attempt to explore the *drammatica*'s legacy, and its reception in Europe as well as in Asia. At this stage new evidence has emerged proving that, for instance, the symbol used by the *drammatica* actors to sign the *colorito vocale* was known to English actors in the second half of the nineteenth century. By noting how Adelaide Ristori passed on her art to Irving's actress Genevieve Ward, and how

Stanislavsky, almost aflame, moulded his system from Duse's acting, an unexplored variety in the reception of the drammatica's legacy is revealed.

Genoa has an incredible story to tell. It rose from an obscurity imposed by its harsh geography to become a merchant-pirate superpower that helped create the medieval world. It fought bitter battles with its great rival Venice and imprisoned Marco Polo, as the feuding city-states connected Europe to the glories of the East. It introduced the Black Death to Europe, led the fight against the Barbary Corsairs, bankrolled Imperial Spain, and gave the world Christopher Columbus and a host of fearless explorers. Genoa and Liguria provided the brains and the heroism behind the Risorgimento, and was the last place emigrants saw before building new lives across the Atlantic. It played host to writers and Grand Tourists, gave football to the Italians, and helped build modern Italy. Today, along with the glorious Riviera coast of Liguria, Genoa provides some of the finest places on earth to sip wine, eat pesto and enjoy spectacular views. This book brings the past to life and paints a portrait of a modern port city and region that is only now coming to terms with a past that is as bloody, fascinating and influential as any in Europe.

critical social theory, *Technologies of Religion: Spheres of the sacred in a post-secular modernity* investigates powerful entanglement of religion and new media technologies taking place today, taking stock of the repercussions of digital technology and culture on various aspects of religious life and contemporary culture more broadly. Making the argument that religion and new media technologies come together to create "spheres"—environments produced by an architecture of digital technologies of all sorts, from projection screens to social networking sites, the book suggests that prior social scientific conceptions of religious worship, participation, community and membership are being recast. Using the case of the strain of American Christianity called "multi-site," an emergent and growing church-model that has begun to win favor largely among Protestants in the last decade, the book details and examines the way in which this new mode of religiosity bridges the realms of the technological and the physical. Lastly, the book situates and contextualizes these developments within the larger theoretical concerns regarding the place of religion in contemporary capitalism. *Technologies of Religion: Spheres of the sacred in a post-secular modernity* offers an important contribution to the study of religion, media, technology and culture in a post-secular world.
