Revealing a bestiary of hybrids from the techno-crazed future and the mythological past, this surreal short story collection takes imaginative leaps through a science fiction influenced landscape. Reflecting a cinematic feel, young couples reach defining stages in their relationships as zombies fall in love, a stalker tracks a young woman through time only to discover he ' s related to her, and a young man battles Godzilla in order to prove a point to his girlfriend. Blurring the boundaries between reality and hallucination—from robotic insects and in-growing cutlery to a woman impregnated with 37 embryos—these fantastical tales offer a world where the body is fluid, the spirit is mechanized, and the beasts know more about humanity than the humans do.
